2018: moving from strength to strength.......  

We are proud to present Cochrane Anaesthesia & Cochrane Emergency and Critical Care achievements for 2018. Check out our 'impacts' on page 5.

Focus  
We are continuing to focus on producing a smaller number of reviews and curating, maintaining and updating our existing substantial review portfolio. This does not mean less work for the Groups, as high-quality reviews need substantial editorial effort to guide them successfully to publication. We are now also committing more time and resources to promoting and disseminating our reviews. The changes in Cochrane structures and processes have also kept us busy. Finally, the prioritization of relevant, meaningful topics and outcomes remains important to us.

Changes within Cochrane  
The Cochrane Steering Group has decided to reorganize the review Group's structure, and function and we were divided into two new Groups: Cochrane Anaesthesia, and Cochrane Emergency and Critical Care. Further, Cochrane has created eight new Networks of Cochrane Review Groups (CRGs). Our two Groups are part of the Acute and Emergency Care Network, along with Acute Respiratory Infections; Bone, Joint and Muscle Trauma; and Injuries. We look forward to collaborating with our new Network colleagues.

Changes within the Groups  
Ann Møller and Nathan Pace have stepped down as Co-ordinating Editors. They will continue their involvement for the two new Groups. These two new Groups will be led by Andy Smith (Anaesthesia), and Harald Herkner (Emergency and Critical Care), who have previously been editors in the group, for many years. All of our achievements, past and present, have been made possible by the leadership of Ann and Nathan. Ann has been our Co-ordinating Editor for 15 years, and Nathan for seven years. They both were involved from the very beginning of the Group in 2000 and we would like to thank Ann and Nathan for their wonderful contributions over the years. They will both continue their involvement as Financial Director and Senior Statistical Editor respectively. We also successfully recruited four new editors.

Our processes  
We continue to hold our monthly editorial teleconferences and are becoming stringent about accepting new titles. We are also finalizing a prioritization strategy and developing a dissemination tool to help review authors promote their finished work.

Our publications  
In 2018 we published 24 new reviews and 8 updates. Browse them on pages 6-9. Cite them, share them, and use them!

Impacts  
Publishing a review on the Cochrane Library is only the start. We monitor citation rates, downloads of reviews from the Library and other measures of interest in our reviews such as Altmetric attention scores. More information is on pages 10 and 11.
We are pleased that our work has been showcased at major international meetings and included in guidelines. You can read more on page 4.

**Funding**
The funding we receive from the Danish Government and Capital Health Region and Minister Erna Hamiltons Legat for Videnskab og Kunst is matched many times over by the unpaid, voluntary contributions of our editors, authors and peer reviewers worldwide. We also secured £17 500 from the UK National Institute of Health Research to help update three of our reviews.

**About us**

From left to right: Monika Afzali Rubin, Karin Frydenlund Jespersen, Harald Herkner, Andrew Smith, Janne Vendt & Ann Møller.

Our **Editorial Office** is located at Herlev Hospital, Herlev, Denmark and consists of:

Andrew Smith, Professor of Anaesthesia, Co-ordinating Editor, Cochrane Anaesthesia
Harald Herkner, Professor of Emergency Medicine, Co-ordinating Editor, Cochrane Emergency and Critical Care
Ann M. Møller, Professor of Anaesthesiology, Financial Director and Content Editor
Jane Cracknell, Managing Editor
Janne Vendt, Information Specialist
Monika Afzali Rubin, Editorial Assistant
Karin Frydenlund Jespersen, Administrative Co-ordinator

**Websites:**
Cochrane Anaesthesia &
Cochrane Emergency and Critical Care

1 New Managing Editor as of 1st of May 2019 Teo Quay
Our editors
Our editors come from many parts of the world.

Content Editors (Anaesthesia):
Ann Møller, Denmark
Anna Lee, Hong Kong SAR
Harald Herkner, Austria
Mike Bennett, Australia
Lars Hyldborg Lundstrøm, Denmark
Stephanie Weibel, Germany

Content Editors (Emergency and Critical Care):
Ann Møller, Denmark
Andrew Smith, UK
Anna Lee, Hong Kong SAR
Arash Afshari, Denmark
Nicola Petrucci, Italy
Bronagh Blackwood, UK
Jasmin Arrich, Germany

Statistical Editors (both Groups):
Cathal D Walsh, Ireland
Jing (Sophia) Xie, Australia
Marialena Trivella, UK
Nathan Pace (senior statistical editor), USA
Susanne Schmitz, Luxembourg
Vibeke Horstmann, Sweden

Consumer editor (both Groups):
Janet Walsh, Australia

Feedback Editor (both Groups):
Jasmin Arrich, Germany
We would like to express our thanks to the following editors for their past contribution to the Groups: Javier Eslava-Schmalbach (Colombia), Mark Neuman (USA). We would like to welcome the following editors to the Groups: Jasmin Arrich (Germany), Lars Hyldborg Lundstrøm (Denmark), Stephanie Weibel (Germany) and Suzanne Schmitz (Luxembourg).

Our impacts
As well as the citation rates and download figures below, we are pleased to see our Group and its reviews continuing to engage health professionals and link to policy and practice.

One example is our review of bedside tests for predicting difficult airways, which achieved an Altmetric score (reflecting social media and academic interest) of 66 within weeks of its launch. This put it in the top 5% of research outputs scored by Altmetric. The lead author was invited to present the review to over 500 anaesthetists at the Difficult Airway Society’s meeting in Edinburgh in November 2018. It is also being cited in the Society’s forthcoming guidelines on Awake Tracheal Intubation, the latest in their series of internationally used and acclaimed airway management recommendations.

You can read the full review following the link here: Airway physical examination tests for detection of difficult airway management in apparently normal adult patients.
Our publications

2018 saw us publish 24 new reviews and 8 updates. We are now registering fewer titles. This has led to a reduction in the number of new protocols published each year. This subsequently will lead to a significant reduction in the number of reviews. Our aim is to conduct a prioritization exercise, which will reduce the number of publications still further; leading to ‘fewer, better, reviews’. We would like to thank each and every one of our authors who contributed to our publication success in 2018.

The Groups’ publications from 2015 to 2018

On the following pages you can click on the title to see the reviews. Please share, cite and use them as much as you can!
Anaesthesia – new reviews

Adverse side effects of dexamethasone in surgical patients.

Airway physical examination tests for detection of difficult airway management in apparently normal adult patients.
Roth D, Pace NL, Lee A, Hovhannisyan K, Warenits AM, Arrich J, Herkner H.

Alpha-2 adrenergic agonists for the prevention of cardiac complications among adults undergoing surgery.
Duncan D, Sankar A, Beattie WS, Wijeysundera DN.

Aromatherapy for treatment of postoperative nausea and vomiting.
Hines S, Steels E, Chang A, Gibbons K.

Automated mandatory bolus versus basal infusion for maintenance of epidural analgesia in labour.
Sng BL, Zeng Y, de Souza NNA, Leong WL, Oh TT, Siddiqui FJ, Assam PN, Han NLR, Chan ESY, Sia AT.

Cerebral near-infrared spectroscopy (NIRS) for perioperative monitoring of brain oxygenation in children and adults.
Yu Y, Zhang K, Zhang L, Zong H, Meng L, Han R.

Continuation versus discontinuation of antiplatelet therapy for bleeding and ischaemic events in adults undergoing non-cardiac surgery.

Continuous intravenous perioperative lidocaine infusion for postoperative pain and recovery in adults.

Epidural analgesia versus patient-controlled intravenous analgesia for pain following intra-abdominal surgery in adults.
Salicath JH, Yeoh ECY, Bennett MH.

Injectable local anaesthetic agents for dental anaesthesia.
St George G, Morgan A, Meechan J, Moles DR, Needleman I, Ng YL, Petrie A.

Intraoperative use of low volume ventilation to decrease postoperative mortality, mechanical ventilation, lengths of stay and lung injury in adults without acute lung injury.
Guay J, Ochroch EA, Kopp S.

Intravenous versus inhalational maintenance of anaesthesia for postoperative cognitive outcomes in elderly people undergoing non-cardiac surgery.
Laryngeal mask airway versus endotracheal tube for percutaneous dilatational tracheostomy in critically ill adults.
Strametz R, Bergold MN, Weberschock T.

Local anaesthetics and regional anaesthesia versus conventional analgesia for preventing persistent postoperative pain in adults and children.
Weinstein EJ, Levene JL, Cohen MS, Andreae DA, Chao JY, Johnson M, Hall CB, Andreae MH.

Perioperative alcohol cessation intervention for postoperative complications.
Egholm JWM, Pedersen B, Møller AM, Adami J, Juhl CB, Tønnesen H.

Perioperative beta-blockers for preventing surgery-related mortality and morbidity.

Pre-emptive and preventive opioids for postoperative pain in adults undergoing all types of surgery.
Doleman B, Leonardi-Bee J, Heinink TP, Bhattacharjee D, Lund JN, Williams JP.

Processed electroencephalogram and evoked potential techniques for amelioration of postoperative delirium and cognitive dysfunction following non-cardiac and non-neurosurgical procedures in adults.
Punjasawadwong Y, Chau-in W, Laopaiboon M, Punjasawadwong S, Pin-on P.

Protocol-directed sedation versus non-protocol-directed sedation in mechanically ventilated intensive care adults and children.
LM, Bucknall T, Kent B, Mitchell M, Burmeister E, Keogh SJ.

Pulmonary artery perfusion versus no perfusion during cardiopulmonary bypass for open heart surgery in adults.
Buggeskov KB, Grønlykke L, Risom EC, Wei ML, Wetterslev J.

Use of hyaluronidase as an adjunct to local anaesthetic eye blocks to reduce intraoperative pain in adults.
Rüschen H, Aravinth K, Bunce C, Bokre D.
Emergency and Critical Care – new reviews

Automated monitoring compared to standard care for the early detection of sepsis in critically ill patients.
Warttig S, Alderson P, Evans DJW, Lewis SR, Kourbeti IS, Smith AF.

BIS monitoring versus clinical assessment for sedation in mechanically ventilated adults in the intensive care unit and its impact on clinical outcomes and resource utilization.
Shetty RM, Bellini A, Wijayatilake DS, Hamilton MA, Jain R, Karanth S, Namachivayam A.

Early intervention (mobilization or active exercise) for critically ill adults in the intensive care unit.
Doiron KA, Hoffmann TC, Beller EM.

Enteral versus parenteral nutrition and enteral versus a combination of enteral and parenteral nutrition for adults in the intensive care unit.
Lewis SR, Schofield-Robinson OJ, Alderson P, Smith AF.

Interventions for treating acute high-altitude illness.
Simancas-Racines D, Arevalo-Rodriguez I, Osorio D, Franco JVA, Xu Y, Hidalgo R.

Interventions for preventing high altitude illness: Part 2. Less commonly-used drugs.

Interventions for preventing intensive care unit delirium in adults.
Herling SF, Greve IE, Vasilevskis EE, Egerod I, Bekker Mortensen C, Møller AM, Svenningsen H, Thomsen T.

Melatonin for the promotion of sleep in adults in the intensive care unit.

Prescribed hypocaloric nutrition support for critically-ill adults.
Perman MI, Ciapponi A, Franco JVA, Loudet C, Crivelli A, Garrote V, Perman G.

Propofol for the promotion of sleep in adults in the intensive care unit.
Lewis SR, Schofield-Robinson OJ, Alderson P, Smith AF.

Vascular access specialist teams for device insertion and prevention of failure.
Carr PJ, Higgins NS, Cooke ML, Mihala G, Rickard CM.
